Canton 2010 Design Workshop

Canton Township, PA –

Interested residents and business owners should plan to attend the next **Canton 2010 design workshop on Tuesday, November 28, 2006, at 6:30 PM, at the Canton Township Municipal Building, located at 665 Grove Avenue, Washington, PA.**

Canton 2010, an exciting community planning initiative, is being undertaken to develop a master plan for the area of the township near Exit 16 (Jessop Place) on Interstate 70. Canton residents and businesses are invited to continue to participate in a community planning process that will define the future of this area of the township.

Based on neighborhood input, a master plan for the future of this important neighborhood is evolving. Citizens are encouraged to attend and learn about proposed improvements for the area. Jim Pashek of Pashek Associates will present a draft plan. The plan is currently recommending:

- Developing commercial property near the interchange;
- Updating residential areas;
- Expanding industrial sites to create new jobs;
- Restoring the Chartiers Creek stream corridor; and
- Connecting the neighborhood to Route 40 to reduce truck traffic through residential areas.

For more information, visit the web at www.yourcanton.com or contact the study public participation consultants.
